

TEXT 1

Tut Hill Motorcycle....

Can be seen from public highway.

Floodlights on all night and pointing towards highway.
In the last submission they made they were told no lighting is allowed.

White Jaguar Car has been parked in there since before Christmas, can be seen from highway, plus in the past few days another car has been left there

Hazardous materials, is there storage of fuel on site? plus a large number of motorcycles are stored in the containers supposedly with fuel in, has the fire service been to inspect the site?

If there was a fire what would happen? Who knows what is stored in the containers?

Double parking in layby of large vehicles obscuring view to the right when exiting

During training too much shouting from instructors, beeping of horns, this is more annoying for nextdoor at Fairfield Money

The portaloos have been sighted behind one of their shipping containers so they can't see it, it's right on show for us to see and smell at the golf club, on a hot summer's day the smell wafts into our yard and hangs there, not nice, it's a huge carpark and it's as close to us as you can get, no consideration of others.

TEXT 2

Rather than calling you, I just wanted to note with you what I had to put up with today (and probably with the finance people nextdoor)

Very loud shouting from the instructor at the motorcycle training place, I could hear him inside our workshop! It was on and off all day, very distracting and annoying, especially when trying to take a phone call, and just have a conversation with someone in our yard.
